

ETT SVENSKT UNDERVERK

LIKE BUILDING AND PAINTING A FENCE – WITHOUT ACTUALLY BUILDING AND PAINTING A FENCE

**FALU RÖDFÄRG
FENCE – PAINTED
AND READY!**

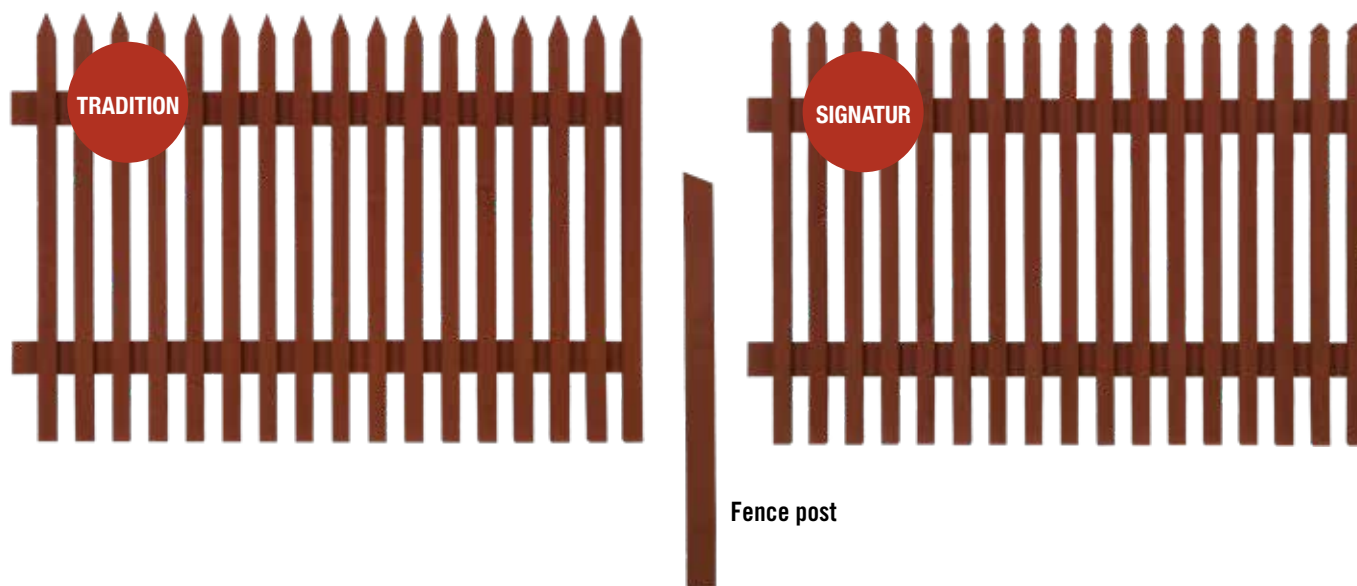

FALU RÖDFÄRG FENCE

Our fences are delivered in sections – pre-painted with Falu Rödfärg Original. Ready to be quickly assembled, giving your garden a beautiful frame. With fence sections, the project becomes easier and, most likely, straighter. Fully painted fence sections provide an additional level of convenience. Anyone who has ever painted a fence knows how time-consuming it is, and it can be difficult to achieve a neat finish. Falu Rödfärg Fence is made from Swedish spruce and factory-painted under optimal conditions, giving you a beautiful, even, and durable result. Each section is 175 cm long and 118 cm high. Posts are sold separately.

A FENCE WITH PARTICULARLY PROTECTIVE PROPERTIES

The unique pigment from Falu Gruva gives the paint naturally protective qualities that preserve your fence year after year. You'll have a fence that not only protects your personal space but also features a paint that protects the fence itself. Thanks to the pigment, your fence will have that characteristic matte surface combined with an intense, natural sheen.

THE FENCES ARE AVAILABLE IN TWO STYLES - TRADITION AND SIGNATUR

TECHNICAL INFORMATION

Fence sections
